

The Battle of Neighbourhood Part one

Introduction

1.1 Business Problem

Nowadays, with the rapid growth of the population density around the world, numerous collaborators have the possibility and the tendency to inaugurate new restaurants in different areas around the world which are safe and secure. This particular project has the objective to provide adequate information for stakeholders who will want to find the optimal location or area for their new restaurant.

Toronto is a potential location where stakeholders will have the possibility to establish their new restaurants. This specific location is considered to be a good decision as it has a great population density, people of different ages and the population have a good standard of living. However, many restaurants are subjected to violent attacks in Toronto.

Safety is considered to be an important factor for the establishment of a restaurant.

1.2 Problem

The Toronto crime rate per neighbourhood is obtained from the waggie dataset and it gives an adequate view of the situation in Toronto areas.

The objective of this project is to figure out if Toronto is an ideal location for the opening of new restaurant and to avoid a time consuming of moving from one place to another in the objective to find the proper place which will fit to the stakeholders.

1.3 Interest

Stakeholders will undisputedly appreciate the possibilities to find out the safest borough in Toronto and in the different neighbourhoods.
